Re: 2006 Hardware Conference

Dear Tom & Dale,

Just a note to say thanks for the conference and all the work you put into it, especially Dale and Tina! When you told me how good this was going to be, I was optimistic. You guys blew me away. It really is the place "Where relationships are formed."

The round table discussions were especially helpful and very significant to the plans we are making for Kaba Ilco. I found most of the answers that I had questions on were answered frankly and without prejudice. I owe that to the great job of moderating the group that you do so well.

Valerie and I are still waiting for our grandson to come into the world and she is very jealous of the good time we had there in Marco Island. I am looking forward to the next conference in 2007 and please sign me up right away.

Sincerely,

Pat Partridge
